

Top Eaton UPSs matched with Eaton ePDUs

Eaton offers the largest selection of enclosure-based power distribution units available on the market. Eaton's ePDU® line offers varying power densities and technologies to satisfy the demand of every IT application. Eaton ePDUs offer single and dual chassis, five technology options, the broadest power range in the market and the ability to manufacture custom ePDUs, and allow arrangement of outlets (number and type) for every region. This unique pairing of Eaton's award-winning UPSs and ePDUs is designed specifically to help IT managers meet their rapidly escalating power requirements!

Combining extended runtime capabilities and exceptional efficiency, the Eaton 5PX UPS is a powerful enterprise class backup solution.

Eaton 9PX UPS provides reliable, versatile and efficient backup power for IT equipment, including Cisco switches and servers.

Top Eaton UPSs matched with Eaton ePDUs - 5 Series UPS

Product	Matching ePDU	U Height	Catalog Number	Input Plug	Receptacles
Eaton 5P/5PX UPS	Basic FlexPDU	1U	EFLX1500R-PDU1U	5-15P	(12) 5-15R
Rating 1000-1500 VA	Monitored	1U	PW101MI1U221	5-15P	(12) 5-15R

Output Receptacles Hardwired + (2) L14-30R, (6) 5-20R					
Rackmount Height: 9U					

Eaton is the leader in providing backup power and power distribution solutions to the industry, here are some of our key benefits:

Leading Energy Efficiency

Eaton provides backup power solutions that lower energy costs and heat dissipation.

- 99.99% efficient ePDUs that will help ensure efficiency in your data center by:
 - Monitoring and measuring power
 - Allowing you to remotely turn off equipment when not in use
- High-efficiency single-phase UPS products
- Award-winning three-phase BladeUPS® System with >98% energy efficiency

Eaton FlexPDU
Basic technology, 1U

Superior Reliability

Eaton's superior reliability ensures you have the protection you need when you need it. Our legendary engineering, design, and quality control are built into all systems from the desktop to the data center.

- ePDU units with high density
- Three-year warranty on 3 series and 5 series includes batteries
- ABM® technology extends battery life

Value Line ePDU
Basic technology, 0U

Simplified Manageability

Eaton's software solutions simplify the management of a wide range of power and environmental devices through a single, web based interface. Intelligent Power Manager software facilitates easy, versatile, remote monitoring and management of multiple ePDUs and UPSs. Additionally Eaton's ePDUs also offer remote and local current monitoring, providing customers the opportunity to remotely monitor the current draw of the individual sections of the ePDU via Ethernet or Serial port.

In addition to remote monitoring, the switched ePDUs allow for environmental monitoring for temperature and humidity.

Innovative Designs

Eaton's innovative designs enable you to free up space to deliver increased productivity, reduce support costs, and allow for scalability and flexibility.

- ePDUs with flexible, tool-less mounting options
- Efficient use of space
- Hot swappable batteries
- Rack/Tower offers flexible form factor
- Modular BladeUPS architecture
- Extended battery modules available
