

Brightlayer Distributed IT - Lite Software

Smarter, simpler monitoring for small-scale environments

Managing technology across multiple remote sites doesn't have to be complicated. Many organizations – be they retail branches, healthcare clinics, schools, or small offices – face the same challenge: how to keep distributed IT equipment running reliably without sending staff to every location.

Brightlayer Distributed IT - Lite is Eaton's new* right-sized software solution designed specifically for environments with a maximum of 50 total devices. It gives you the same confidence and control that larger enterprises rely on, but in a package tailored for smaller infrastructures.

Keep your IT running smoothly - wherever it is

Brightlayer Distributed IT - Lite puts your distributed IT assets at your fingertips, offering real-time visibility, proactive alerts, and secure remote management tools. That means your team can spot issues early, take corrective action without traveling on-site, and keep essential systems online with minimal effort.

*Brightlayer DIT - Lite replaces IPM 2.0 as the software solution designed for smaller environments.

EATON

Powering Business Worldwide

Efficiency at scale

Cut down on wasted time and site visits. Intuitive dashboards, alerts, and trend charts give you clear insight into device health, helping your IT staff troubleshoot quickly and prioritize what matters.

Remote Device Management

With the ability to push firmware updates remotely, Brightlayer Distributed IT - Lite helps keep your connected Eaton equipment up-to-date while reducing the burden of manual updates at each site.

Resiliency you can rely on

Remote control of UPS load segments and PDU outlets means you can restart devices or shift loads without being physically present—minimizing downtime and keeping critical systems running.

Early alarming to mitigate risk

Receive immediate alerts on connected equipment, enabling rapid response to maintain uptime and protect critical infrastructure.

What Brightlayer Distributed IT - Lite can do for you

Monitor a maximum of **50 total devices** across distributed sites.

View **real-time reports**, trend charts, and dashboards.

Receive **alerts and notifications** prioritized by severity.

Remotely control **rack UPS and PDU devices**.

Access **user-defined home screens** for quick insights.

Compatible with **multi-vendor environments**.

How it compares to Brightlayer Distributed IT

Brightlayer Distributed IT - Lite delivers the essentials for smaller infrastructures, while the full Brightlayer Distributed IT platform scales to unlimited devices and includes deeper integration with both IT and OT assets.
